

Manual Ironing Table Redesign

A cleaner version of the actual large hollow ironing table: white padded top, open organized underside, heat-safe iron pads, tool holders and royal purple brand details.

CORE IDEA

- Keep the table large and hollow/open inside.
- Make the inside organized with divided shelves and removable bins.
- Keep the surface plain white, padded and easy to replace.
- Add safe iron rest pads at both ends.
- Use subtle IN & OUT royal identity accents.

RECOMMENDED SIZE

- Large working version: 2400 L x 900 D x 900 H mm.
- If site is tight, reduce length to match final floor plan.
- Final dimensions must be checked on site before fabrication.

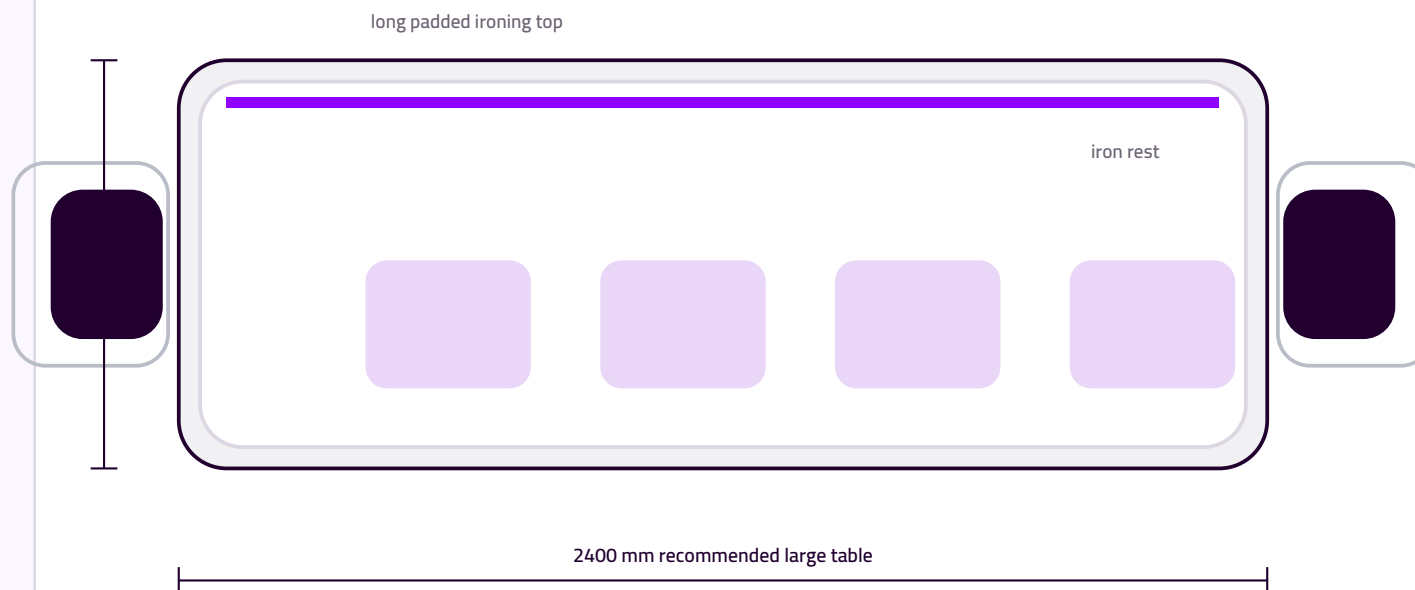

All-Side Visual Direction

Use this as the visual target for the joinery and metal fabricator. The table remains practical: open inside, easy to clean, and strong enough for daily ironing work.

Top Plan & Working Zones

INDICATIVE TOP PLAN

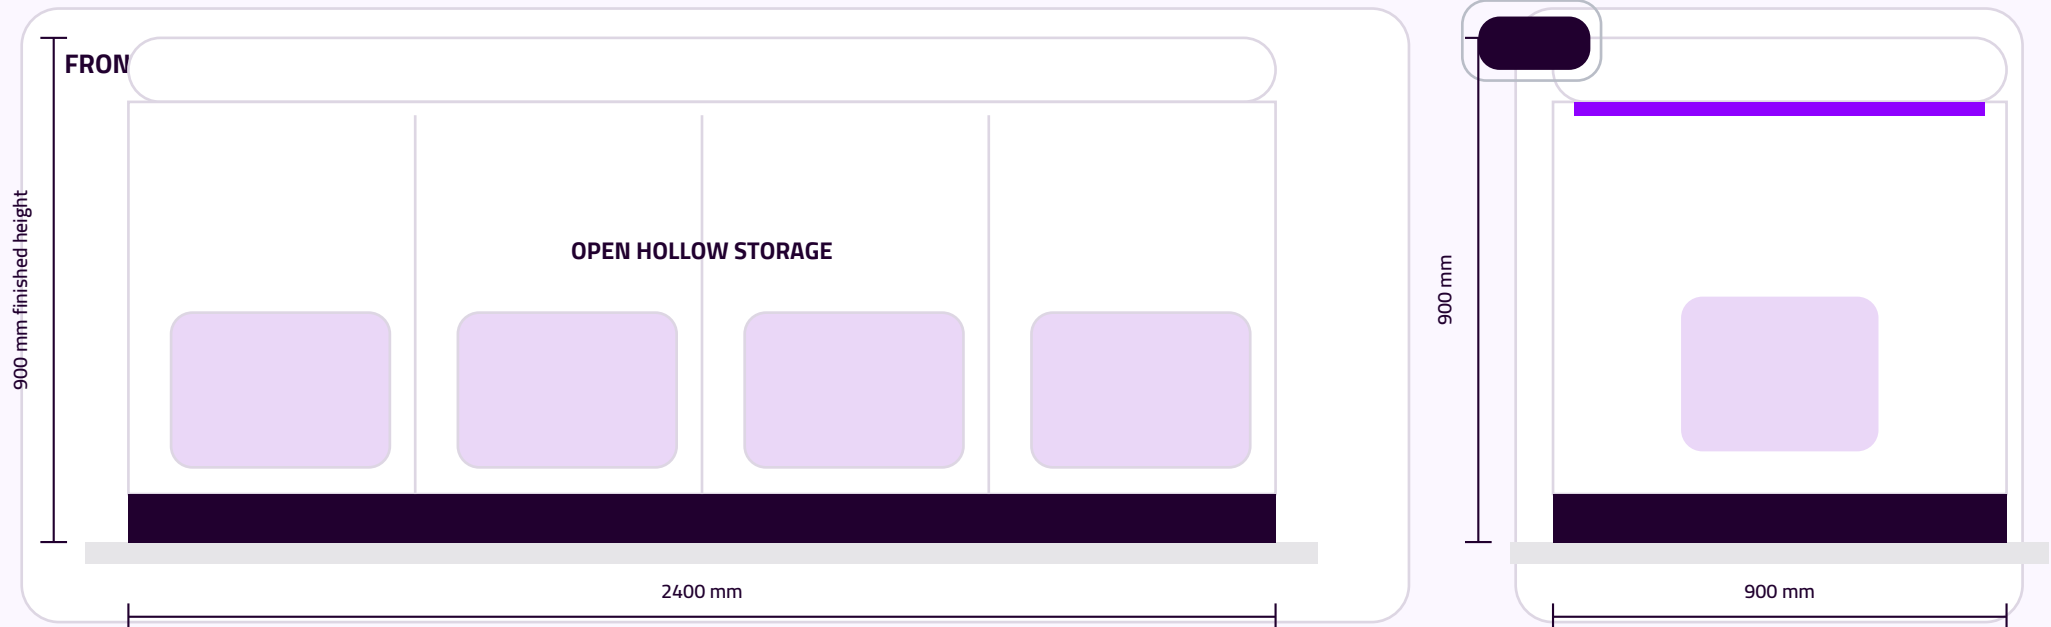

TOP SURFACE

- Replaceable white ironing cover over heat-resistant padding.
- Soft rounded corners to avoid fabric snagging.
- No loose cloth hanging below the top edge.
- Iron rest pads must be heat resistant and fixed securely.

WORKFLOW

- Clean folded items in bins below.
- Spray bottles and tags fixed on side holders.
- Power cable routed through clips, not across the floor.
- Leave clear movement space around both long sides.

Front, Back & Side Elevations

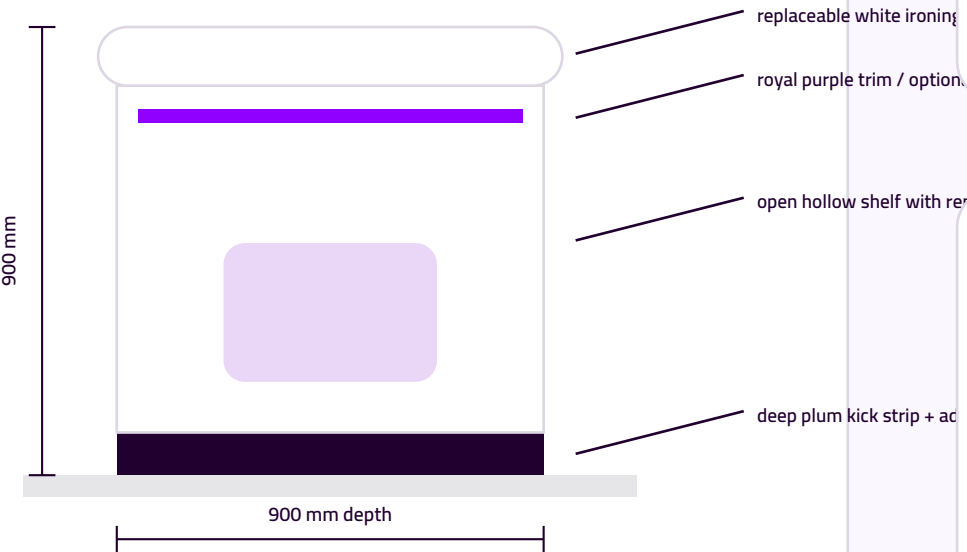

ELEVATION NOTES

- Open hollow storage should stay visible and clean; avoid turning it into a fully closed cabinet.
- Use four internal bays for bins or folded linens. Minimum clear bay width: 450-500 mm.
- Recommended clear storage height below top rail: 520-600 mm.
- Use adjustable stainless feet for leveling and easy floor cleaning.
- Use deep royal plum lower skirting only as an accent, not as a heavy closed base.

Materials & Hollow Storage Detail

TYPICAL SECTION

MATERIAL SCHEDULE

ITEM	MATERIAL	NOTE
Frame	White powder-coated steel / compact board	Moisture resistant
Top	Heat-resistant padding + white cover	Replaceable cover
Shelves	White HPL / compact laminate	Wipe-clean
Accent	Royal purple trim	#8F00FF
Feet	Adjustable stainless leveling feet	Easy floor cleaning

FABRICATION RULES

- No exposed sharp metal edges near fabric path.
- All bins removable for cleaning.
- Iron pads fixed mechanically, not loose.
- Power route clipped under the top or side frame.
- Do not store chemicals directly under hot iron zones.

Joinery & Site Handover

WHAT TO CONFIRM BEFORE FABRICATION

- Confirm final table length against the actual branch plan and circulation around both ironing tables.
- Confirm iron type, iron rest size, cable route, socket location and heat pad material.
- Confirm number and size of removable bins, folded-cloth shelf height and tag holder position.
- Confirm top cover fabric, padding thickness, cleaning method and replacement process.
- Build one corner/side mock-up for approval before producing both tables.

OWNER APPROVAL

- Approve large table size or reduced site-fit size.
- Approve open hollow storage layout.
- Approve purple trim and logo placement.
- Approve iron rest and spray bottle holder details.

SAFETY NOTES

- Keep hot irons away from stored fabrics and chemicals.
- Use heat-resistant surfaces at both ends.
- Provide cable strain relief and avoid floor cables.
- Keep floor below table easy to clean and inspect.
